15 Aug 1985
FLAMING GORGE — Mac fishing has been fair. Use a white five-eighths ounce jig with half a minnow on the back. Fish down 70-100 feet.

OGDEN RIVER — The river is down and clear and Brown Trout fishing has been good. Use a size one brass Vibrax.

NOTCH LAKE — Good fishing near the outlet. Use a size 14 mosquito fly six feet behind a Cast-a-Bubble. Use four or six pound test.

MEADOW LAKE — Great fishing on the inlet side. Use a brass Jakes Spin-a-Lure or a size zero silver Mepps.

SAND LAKE — Fishing is good with size 10 black ant. Fish with a slow retrieve and a full Cast-a-Bubble.

PROVO RIVER — The river is almost green because of all the algae coming out of the lake. Fish-

Deer Creek Island Fishing Still Rated as Good

28 Nov 1985
UTAH LAKE — Fishing has been fair just off the inlet streams where the cold water brings in food and the lake water is warmer. Use worms with no weight for the White Bass.

PROVO RIVER — The lower end is good. Use cheese flavor Balls of Fire on a size 16 treble.

Let the fish take the bait. Most of the big deep holes have been fished hard so fish in the small, deep side pocket pools.

DEER CREEK — The north side of the island is still a good place to fish with worms or Velveeta. Use four pound test line and a size 10 egg sinker with a single BB split shot as a stop. The bite is light.

LAKE POWELL — The Stripers are hitting anchovies. Use elec-

tronics to find the schools then drop the bait right in the middle of the school. Use a jigging action. When they stop hitting, switch to a five-eighths ounce white maribou jig and swing it through the school.

OGDEN RIVER — Brown Trout fishing has been good with size zero brass Mepps and black Panther Martins.

SOUTH FORK — Good fishing with Balls of Fire on a size 14

treble. Use four pound test and a long light action rod. The bite is very light and the hook should be set on the pick up.

WILLARD BAY — Fishing has been slow — even for the Catfish. This one is not worth the trip.

FLAMING GORGE — The Rainbows have moved up and are hitting worms. The Macs are up and taking white jigs. Use a one-half to three-quarter ounce jig.
